

Meter Testing Demand

Account #

Meter ID

I, _____, am questioning the accuracy of the water meter installed at my home located at _____.

Therefore, I am demanding that the meter be tested for accuracy by an agency or business with certified benchmark equipment, and that results of the test be provided to me for review. I am aware that I am able, upon request, to be present during the test to be conducted by Water Resources, Inc. 390 Sadler Avenue, Elgin, IL. I am indicating below by initial my decision to be present during testing.

initial Yes, I want to be present during testing and will contact Water Resources to confirm an appointment date for test to be conducted. 847-742-3400

initial No, I decline the right to be present and will accept the results of the test without dispute.

I fully understand that such testing costs two hundred dollars (\$200.00) and agree to pay one hundred dollars (\$100.00) as a deposit, payable to ABT Water Treatment, Inc., prior to meter removal and testing.

Further, I fully understand and agree that this deposit amount shall be refunded if the test shows the meter to be over-registering by more than 2 percent. However, the entire cost resulting from the meter test shall be the responsibility of the mobile home park occupant, payable to ABT Water Treatment, Inc. if the results of the test show the meter to be registering accurate at or less than 102 percent. If the meter is deemed accurate I agree to pay all disputed billing prior to the demand for testing.
